Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 01/21/2010 was filed after the mailing date of the notice of allowance on 12/30/2009. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.
2. The examiner has considered the references in the IDS, and still could not find any reasons to reject the allowed claims. Therefore, the claims filed on 08/11/2006 are still allowable over the references in the IDS filed on 01/21/2009.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

Claims 1 - 4 are allowed based on the follow reasons:

The prior art fails to disclose or suggest alone or in combination as claimed a difference between the floor reaction force moment horizontal component $M2(t)$ generated at the time t on the second dynamic model by the provisional motion and the floor reaction force moment horizontal component $M1(t)$ generated at the time t on the first dynamic model by the provisional motion ($M2(t)-M1(t)$) is defined as a floor reaction force moment horizontal component error $Merr(t)$, and a difference between the translational floor reaction force horizontal component $F2(t)$ generated at the time t on the second dynamic model by the provisional motion and the translational floor reaction force horizontal component $F1(t)$ generated at the time t on the first dynamic model by the provisional motion ($F2(t)-F1(t)$) is defined as a translational floor reaction force horizontal component error $Ferr(t)$, then the provisional motion correcting means corrects

Art Unit: 3661

an instantaneous value of the provisional motion at the time t such that a value obtained by adding either the floor reaction force moment horizontal component error $M_{err}(t)$ or a first floor reaction force correction amount determined on the basis of at least the floor reaction force moment horizontal component error $M_{err}(t)$ to the floor reaction force moment horizontal component generated at the time t on the first dynamic model by a motion obtained by correcting the provisional motion agrees with the desired value at the time t , and a value obtained by adding either the translational floor reaction force horizontal component error $F_{err}(t)$ or a second floor reaction force correction amount determined on the basis of at least the translational floor reaction force horizontal component error $F_{err}(t)$ to a translational floor reaction force horizontal component generated at the time t on the first dynamic model by a motion obtained by correcting the provisional motion satisfies the permissible range at the time t .

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
